# Experience

## Software Engineer at Wave

May 2017 to August 2017

Full stack developer on the Accounting team, in Toronto Canada. Worked on the Next Accounting software, using Python, Django, React, and created a highly scalable PDF report generation service, using Ruby on Rails & Prawn. Developed A/B testing, and analytics for other projects.

## Full Stack Developer at Tulip Retail

January 2017 to April 2017

Full stack web developer on the Well.ca team, in Toronto Canada. Worked on a mixture of system administration for various AWS build systems, front-end design, as well as back-end feature additions and bug fixes mostly with PHP5 and various other technologies.

### Web Developer at *Symcor Inc.*

May 2016 to August 2016

Full stack developer on the Enterprise Architecture team. Worked with a full Java stack doing feature implementation on a complex web application that collected data on all software at Symcor.

## Web Application Developer at Adknown

September 2015 to December 2015

Managed dozens of WordPress sites doing system administration, and in-house plugin integration. Wrote highly optimized JavaScript user analyzing scripts, built dynamic JavaScript & CSS3 ads, and wrote many highly efficient cron job scripts. Designed an Amazon Web Services web application.

#### Education

#### University of Guelph

Expected to Graduate May 2018

Bachelor of Computing, Software Engineering (Co-op)
